Angela,

If you could have someone call me with a few possible dates and times for a conf call, as well as what type of additional info they are looking to discuss, that would allow us to try to pull pertinent info and have the appropriate people available to help answer your questions.

Thanks,

Tim

Hi Angela,

I need to follow-up with DEC regarding dates. Were you able to find out which dates are not good for you guys. That will help with the scheduling.

For additional information on the sites, they may start with Tim Rice. I believe your contractors copied all the relevant information from our files but they can reach out to Cindy Costello at DOH if they have questions. Thanks!

Tim, Steve, Cindy, -

Please also let me know what dates are not good for you so we can try to schedule the meeting before our collective calendars become full ☺

Hi Adela,

Just wanted to see if there were any dates that you were thinking of for our meeting? Also, our removal folks would like to speak with someone with the state to get some additional information about the sites – should I refer them to Tim or someone on your staff.

Many thanks

Angela

Definitely. We could host an in person meeting at the DEC office in New Paltz. Let me coordinate with my staff in radiation and the DEC folks and will get back to you on a couple of dates. Are there any dates that you know now will NOT work for you and others at EPA? Thanks Angela!

Good afternoon Adela,

Hope all is well. The Pre-remedial folks have completed their evaluation of the four rad sites for potential listing on the NPL. Removal is still looking at the sites. Would you like to get together (in person/via conf call) to discuss the listing results at least?

Thanks,

Angela

Hi Adela,

I'm enjoying summer so far, especially after the rotten winter we had! Hope you are doing the same.

I know that the pre-remedial folks have pretty much finished their assessment of the site (these are the folks who score sites for NPL listing) and I will check with the removal staff but I would think that next month is feasible. I think you are correct, I think we were aiming for a face-to-face in New Paltz. I will talk to removal and confirm that they have completed their assessment and let you know.

Kind regards,

Angela

Hi Angela,

I hope this note finds you well. I'm following up on our plans to meet with you and others from your office to get an update on EPA's review of the radiologically contaminated sites we asked you to look into. My recollection is that we were trying to meet in New Paltz, but don't remember the time frame. Do you think a meeting in the next month is feasible? Please let me know. If so, I'll check with DEC folks and will send you some proposed dates so we can hopefully set it up.

Thanks a lot!

Adela
